- Before starting to feed Rumevite Pasture Beef 15 Pellets ensure the appropriate animal husbandry procedures are completed - consult a veterinarian for advice. Cattle of similar size and age should be drafted into groups.
- Before starting to feed Rumevite Pasture Beef 15 Pellets ensure all cattle have been fed with forage to appetite - ensure all cattle are full with forage.
- Start feeding cattle with Rumevite Pasture Beef 15 Pellets at a rate of 0.5 kg per 100 kg liveweight per day. Gradually increase the rate of feeding each day for the next 21 days up to the desired level of feeding, or up to 2 kg per 100 kg liveweight per day.
- Rumevite Pasture Beef 15 Pellets can be fed in either troughs or self-feeders.

- When feeding in self-feeders, cattle will require 7.5 – 15 cm of trough space per head.
- When feeding in troughs, cattle will require up to 25 – 30cm of trough space per head, depending on their size and liveweight.
