SHEEP FEED

# RAISING THE BAA

## BARASTOC<sup>®</sup> EWE SUPPLEMENT

A grain-based supplement for ewes grazing mature dry pasture or hay.

PROTEIN &  
ENERGY  
SUPPLEMENT

PALATABLE  
PELLETISED  
FEED

BALANCED  
VITAMINS &  
MINERALS

### OVERVIEW

- + Contains optimal levels of protein and energy for supplementing ewes, including ewes with lambs at foot
- + Palatable ingredients in a pelleted form to prevent selective feeding
- + Contains balanced levels of calcium, phosphorus, trace minerals and vitamins to support healthy production
- + Contains 30mg/kg Lasalocid (as Bovatec<sup>®</sup>) for the reduction of faecal shedding of coccidia (*Eimeria* spp.) in sheep maintained in confinement

### FEEDING GUIDE

**Barastoc Ewe Supplement** is suitable for feeding to adult ewes and ewe replacements in conjunction with unlimited pasture or hay.

Before starting to feed **Barastoc Ewe Supplement** ensure that the appropriate animal husbandry procedures are completed - consult a veterinarian for advice. Ewes of similar size and age should be drafted into groups.

Before starting to feed **Barastoc Ewe Supplement**, ensure all ewes have been fed with palatable hay to appetite for the first day.

Start feeding ewes with **Barastoc Ewe Supplement** at a rate of 0.5% liveweight per day. Gradually increase the rate of feeding each day for the next 21 days up to the desired level of feeding, or up to 1.5% liveweight per day.

When feeding **Barastoc Ewe Supplement** in a self-feeder or trough, ensure that dry pasture and/or hay is readily available, and that livestock are able to eat this forage to appetite at all times.

If high volumes of dry pasture are available, encourage stock to graze out in the paddock by placing supplement further out, away from water sources. Only do this once stock have taken to the supplement. If pastures become grazed out provide additional hay in racks.

## FEEDING GUIDE continued...

When using self-feeders, adjust slide settings to regulate feed intake and achieve recommended feeding rates. The feeder slide should be set so that ewes have to lick the feed out from under the slide. When using self-feeders, ewes will require 10–12cm of trough space per head. If feeding by hand into troughs, the supplement should be allocated on a daily basis. When using troughs, ewes require up to 20–30cm of trough space per head.

## WARNINGS

**Medicated animal foodstuff** - for animal treatment only. Use strictly as directed and keep out of reach of children.

This product contains Lasalocid (as Bovatec®). Do not feed to dogs, horses or other equids as this may be fatal.

Withholding period: SHEEP.

**Meat:** Zero (0) days.

**Milk:** DO NOT USE in lactating ewes which are producing or may in the future produce milk that may be used or processed for human consumption.

This feed has been formulated specifically for animals as described, and must not be used for other species of animals.

This feed is unsuitable for human consumption.

The manufacturer accepts no responsibility if this feed is used in quantities, conditions or in any way other than in accordance with the manufacturer's recommendations.

**This product does not contain restricted animal material.**

## STORAGE REQUIREMENTS

.Store under cover in a cool, dry place below 30°C and protected from exposure to direct sunlight.

### AVAILABILITY\*

Bulk	102035
Bulka Bag	102037
Bulka Bag - Cubes	102038
20kg Bag	401997
